Step 1 Preparation

1 Check the Supplied Accessories

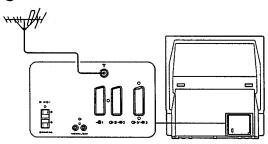

When you've taken everything out of the carton, check that you have these items:

- RM-862 Remote Commander
- · Two IEC designation R6 batteries
- Bracket (2)
- 2 Insert the Batteries into the Remote Commander

Note: Always remember to dispose of used batteries in an environmentally friendly way.

3 Connect the Aerial

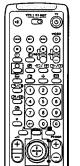

Fit an IEC aerial connector attached to 75-ohm coaxial cable (not supplied) to the Υ socket at the rear of the TV.

Step 2 Tuning in to TV Stations

Depress ① (main power switch) on the TV.
 The TV will switch on. If the standby indicator on the TV, is lit, press
 or a number button on the Remote Commander.

- Press MENU.
- 3 Push the joystick to blue or green to select the symbol ; then push to yellow.
 The PRESET menu appears.
- 4 Push the joystick to blue or green to select "Language", then push to yellow.
- 5 Push the joystick to blue or green to select the language you want, then push to yellow.

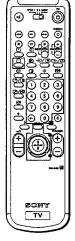

6 Press MENU to restore the normal TV picture.

2 Preset Channels Automatically

With this function, the TV automatically searches and stores up to 100 channels onto programme positions. If you prefer "Presetting Channels Manually", please refer to page 10 in Additional Presetting Functions.

- Depress ① (main power switch) on the TV. The TV will switch on. If the standby indicator on the TV is lit, press or a number button on the Remote Commander.
- Press and hold the EEI on the TV until the automatic menu is displayed and the search starts. After all available channels are stored, the normal TV picture is

Presetting channels automatically by using the Remote Commander

- Press MENU.
- 2 Push the joystick to blue or green to select the symbol 🖹 , then push to yellow. The PRESET menu appears
- 3 Push the joystick to blue or green to select "Auto Programme".
- Push to yellow and hold until the AUTO PROGRAMME menu is displayed and the search starts. After all available channels have been preset, the normal TV picture is shown.

You can sort the programme positions to have them appear on screen in the order you like. For details, see "Sorting Programme Positions" on page 11.

(CONVERGENCE)

ė

€

Converge the Red, Green, and **Blue Lines**

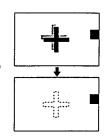

- 1 Press (button on the TV.
- 2 The Auto Convergence function works for about 30 seconds.

Step 3 Adjusting Colour Registration

When the auto convergence function does not work correctly

Adjust the colour registration by selecting the "Convergence" of the PRESET menu.

- Push the joystick to blue or green to select the symbol 🖨 , then push to yellow. The PRESET menu appears.
- 3 Push the joystick to blue or green to select "Convergence", then push to yellow. The CONVERGENCE menu appears.
- Push the joystick to blue or green to select "the line" (vertical and horizontal lines in red and blue) you want to adjust. Press the joystick to confirm.
- + : red vertical line (left/right adjustment)
- + : red horizonta line (up/down adjustment) + : blue vertical line (left/right adjustment)
- : blue horizontal line (up/down adjustment)
- The line to adjust is selected.
- 5 Push the joystick to blue or green to converge the selected line with the green line in the centre. Press the joystick to confirm.
- Repeat steps 4 and 5 to adjust the other lines, until all the lines have overlapped to form a white cross.
- 7 Press MENU to restore the normal TV picture.

Additional Presetting Functions

MANUAL PROGRAMME PRESET

Presetting Channels Manually

Using this function, you can preset channels one by one to different programme positions. This is also convenient to allocate programme numbers to video input sources.

- 1 Press MENU
- 2 Push the joystick to blue or green to select the symbol 🖨 on the menu screen. Push to yellow to confirm the selection.
- 3 Push to blue or green to select "Manual Programme". Push to yellow to confirm the selection.
- 4 Push to blue or green to select the programme position (PROG) to which you want to preset a channel. Push to yellow to confirm.
- 5 Push to blue or green to select the TV broadcast system (SYS) (I for U.K., B/G for western European countries, D/K for eastern European countries, L for France) or a video input source (AV1, AV2, AV3, YC2, YC3, RGB). Push to yellow to confirm.
- 6 Push to blue or green to select "C" (for terrestrial channels) or "S" (for cable channels). You can also select "C" or "S" by pressing C on the Remote Commander. For selecting "C", press C once, and for "S", press it twice. Push to yellow to confirm.

There are two options to preset channels manually:

- You know the channel number.
 Please use method "Direct Input".
 or
- b) You don't know the channel number.
- 7 a) Direct Input

Select the first number digit of "CHAN" (channel), then the second number digit of "CHAN" with the number buttons on the Remote Commander (e.g. for channel 2, first press 0, then 2).

7 b) Searc

Push the joystick to blue or green to search for the next available channel.

- 8 If you want to store the channel, go to step 9. If not, select a new channel using the number button on the Remote Commander or push the joystick to blue or green to resume the search.
- 9 Press the joystick to confirm.
- 10 Repeat steps 4 to 9 to preset other channels.
- 11 Press MENU to restore the normal TV picture.

MANUAL PROGRAMME PRESET

Manual Fine-Tuning

Normally, the automatic fine-tuning (AFT) function is already operating.

If the picture is distorted, however, you can manually fine-tune the TV to obtain a better picture reception.

- 1 Press MENU
- 2 Push the joystick to blue or green to select the symbol en on the menu screen. Push to yellow to confirm.
- 3 Push to blue or green to select "Manual Programme". Push to yellow to confirm.
- 4 Push to blue or green to select the programme number which corresponds to the channel you want to manually fine-tune.
- 5 Push to yellow repeatedly until the AFT position changes colour.
- 6 Push to blue or green to fine-tune the channel frequency (-15 to +15).
- 7 Press the joystick to confirm.
- 8 Repeat steps 4 to 7 to fine-tune other channels.
- Press MENU to restore the normal TV picture.

(dB

PROGRAMME SORTING

Sorting Programme Positions

This function enables you to sort the programme positions to a preferable order.

- 1 Press MENU.
- 2 Push the joystick to blue or green to select the symbol on the menu screen. Push to yellow to confirm.
- 3 Push to blue or green to select "Programme Sorting". Push to yellow to confirm.
- 4 Push to blue or green to select the programme position of the channel you want to change. Press joystick to confirm.
- 5 Push to blue or green to select the programme position of the channel you want to exchange. Press joystick to confirm.
- 6 Repeat steps 4 and 5 to sort other programme positions.
- 7 Press MENU to restore the normal TV picture.

Skipping Programme Positions

This function enables you to skip unused programme positions when selecting them with the PROGR +/- buttons. However, by using the number buttons you can still select the skipped

- 2 Push the joystick to blue or green to select the symbol 🖨 on the menu screen. Push to yellow to confirm.
- 3 Push to blue or green to select "Manual Programme". Push to yellow to confirm.
- 4 Push to blue or green to select the programme position you want to skip. Push to yellow to confirm.
- Push to blue or green to select "---" in the position SYS (system). Press the joystick to confirm.
- Repeat steps 4 and 5 to skip other programme positions.
- 7 Press MENU to restore the normal TV picture.

MANUAL PROGRAMME PRESET

 ∞

Captioning a Station Name

Channels are automatically labelled during presetting. You can, however, individually name a channel or a video source using up to five characters.

- 2 Push the joystick to blue or green to select the symbol 😝 on the menu screen. Push to yellow to confirm.
- Push to blue or green to select "Manual Programme". Push to
- 4 Push to blue or green to select the programme position with the channel you want to label. Push to yellow repeatedly until the first element of the position LABEL is highlighted.
- 5 Push to blue or green to select a letter or a number (select "-" for a blank). Push to yellow to confirm. Select the other four characters
- 6 After selecting all characters, press the joystick to confirm.
- Repeat steps 4 to 6 to label other channels or video sources.

To unblock Select the channel to unblock in the "PARENTAL LOCK" menu. Press the joystick. The symbol û disappears.

Using Parental Lock

This function enables you to prevent children from watching undesirable broadcasts.

- 2 Push the joystick to blue or green to select the symbol 🖨 on the menu screen. Push to yellow to confirm.
- Push to green or blue to select "Parental Lock". Push to yellow to
- Push to green or blue to select the channel you want to block. Press the joystick to confirm. The symbol & appears before the programme position to indicate that this channel is now blocked.
- 5 Repeat step 4 to block other channels
- Press MENU to restore the normal TV picture.

6

GB :

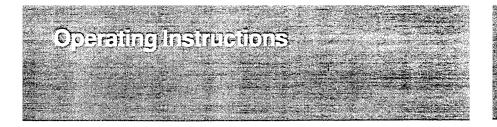

Tuning in a Channel Temporarily

You can tune in to a channel temporarily, even though it has not

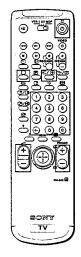

- Press C on the Remote Commander. For cable channels, press C
- The indication "C" ("S" for cable channels) appears on the screen. 2 Enter the double-digit channel number using the number buttons
- (e.g. for channel 4, first press 0, then 4). The channel appears. Note that the channel will not be stored.

After you tune in a channel temporarily, you cannot enter the manua preset mode. To store the channel, refer to the "Presetting Channels Manually" on page 10.

Watching the TV

If no picture appears when you depress ① on the TV and if the standby indicator on the TV is it, the TV is in standby mode.

Press ②, PROGR+/- or one of the number buttons to switch it on.

This section explains the basic functions you use while watching the TV. Most operations are done using the Remote Commander.

Switching the TV on and off

Switching on

Depress ① on the TV.

Switching off temporarily

Press () on the Remote Commander.

The TV enters standby mode and the standby indicator on the tront of the TV lights up in red.

To switch on again

Press O, PROGR +/-, or one of the number buttons on the Remote Commander.

Switching off completely

Depress ① on the TV and the indicator on the front of the TV lights up in amber.

To save energy, we recommend you switch off your TV completely when the TV is not in use.

Selecting TV Programmes

Press PROGR +/- or press the number buttons.

To select a double-digit number

Press -/--, then the numbers.

For example, if you want to choose 23, press ---, 2 and 3.

Adjusting the Volume

Press <u></u> → +/-.

Operating the TV Using the Buttons on the TV

To select the programme number, press the PROGR +/- buttons. To adjust the volume, press the △ +/- buttons.

To select the video input picture, press the -€ button.

Watching Teletext or Video Input

Watching teletext

Press
to view the teletext.

2 For teletext operation, enter a 3-digit page number with the number buttons to select a page.
For fastext operation, push the joystick to the colour mark which

corresponds to the colour-coded menu.

For both operations, press (PAGE +) for the next page or
(PAGE -) for the preceding page.

3 To go back to the normal TV picture, press O.

Watching a video input picture

- 1 Press repeatedly until the desired video input appears.
- 2 To go back to the normal TV picture, press O.

GB

Balance	More left More right
Reset	Resets sound to the factory preset levels.
Spatial	Off: normal On: acoustic sound effect
Dual Sound	A: left channel B: right channel Stereo → Mono The selected mode of the A-CD-B indicator on the TV lights up.
Volume Offset	Presets the volume level for individual programmes. —12 ——————————————————————————————————
∩ Volume	Less ——— More
∩ Dual Sound	A: channel 1 → B: channel 2 Stereo → Mono
Speaker	Main: sound from TV set Centre in: sound from external amplifier

When "User" is selected in "Sound Mode"

You can preset Treble and Bass as follows:

- 1 Push the joystick to blue or green to select the desired item. Push to yellow to confirm.
- 2 Push to red or yellow to adjust. Press the joystick to confirm.
- Push to red to return to the PICTURE CONTROL menu.

TIMER To switch off the timer Select "OFF" in step 3.

To check the remaining time Press (+).

To go back to the normal TV picture Press MENU.

Using the Sleep Timer

You can select a time period after which the TV automatically switches into standby mode.

1 Press MENU.

2 Push the joystick to blue or green to select the symbol @ on the menu screen. Push to yellow to confirm. 3 Push to yellow. Push to red or yellow to set time delay and press

the joystick to confirm. OFF--0:30--1:00--1:30....

4 Press the joystick to confirm.

One minute before the TV switches into standby mode, a message is displayed on the screen.

0

GB

Note Teletext errors may occur if the broadcasting signals are weak, TV stations broadcast an information service called Teletext via the TV channels. Teletext service allows you to receive various information pages such as weather reports or news at any time you want.

Direct Access Functions

Switching Teletext on and off

- Select the TV channel which carries the teletext broadcast you want to watch.
- 2 Press ® to switch on teletext. A teletext page will be displayed (usually the index page). If there is no teletext broadcast, the indication P100 is displayed on
- 3 Input three digits for the page number using the number buttons. If you have made a mistake, type in any three digits. Then re-enter the correct page number.
- 4 Press O to return to the normal TV picture.

Accessing next or preceding page

Press (PAGE+) or (PAGE-).
The next or preceding page appears.

Superimposing the teletext display on the TV programme

Press @ once to get Teletext only.

Press (2) twice for Mix mode.

The normal TV screen and the Teletext screen are overlapped.

Preventing a teletext page from being updated

Press ④.

The symbol "⊕" is displayed on the information line. Press again to cancel.

Revealing hidden information (e.g. for a quiz)

Sometimes pages contain concealed information, such as answers to a quiz. The reveal option lets you disclose the information.

Press ① . Press again to cancel.

Press (a) to resume normal teletext reception.

Favourite page system

You can store up to four of your favourite teletext pages per Teletext service. In this way you have quick access to the pages you frequently use.

Storing pages

- 1 Use the number buttons to select the page you would like to store.
- 2 Press twice.

The colour prompts at the bottom of the screen flash.

Push the joystick to the desired colour to store the selected page. The page is now stored on this colour.

Repeat steps 1 to 3 for the other 3 pages.

Displaying the favourite pages

1 Press ⊕.

Fastext operation is

possible, only when the

TV station broadcasts

Fastext signals.

Using Fastext

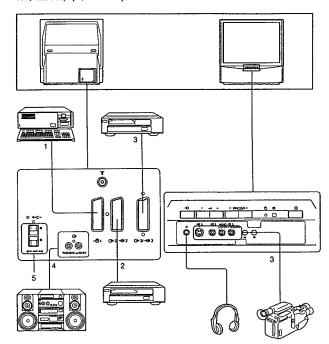

With Fastext you can access pages with one key stroke. When a Fastext page is broadcast, a colour-coded menu will appear at the bottom of the screen. The colours of this menu correspond to the red, green, yellow and blue positions on the Remote Commander.

Push the joystick to the colour mark which corresponds to the colour-coded menu. The page will be displayed after a few seconds.

GB

Connecting Optional Equipment

You can connect optional audio-video equipment to this TV such as a VCR, video disc player, and stereo system.

To connect a VCR using the Y terminal Connect the aerial output of the VCR to the aerial terminal T of the TV. We recommend that you tune in the video signal to programme number "0". For details, see "Presetting Channels Manually on page 10.

If the picture or the sound is distorted Move the VCR away from

About S video Inputs (Y/C input) Video signals can be separated into Y (luminance or brightness) and C (chrominance) signals. Separating the Y and C signals prevents them from interfering with one another, therefore it improves picture quality (especially luminance). This TV is equipped with 3 S Video input lacks. through which these

When connecting a monaural VCR Connect only the white -D jack to both the TV and VCR.

separated signals can be input directly

When you connect the equipment to the -533/ -03/-03 connectors on the front panel and @-3/ rear panel, turn off the power of the equipment not in use.

Acceptable input signal

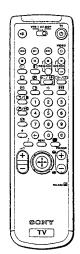

- Normal audio/video and RGB signal
- 2 Normal audio/video and S video signal
- Normal audio/video and S video signal
- Centre speaker input Set "Speaker" on the SOUND CONTROL menu to "Centre in".

Available output signal

- Video/audio from TV tuner
- Video/audio from selected source
- No outputs Video/audio from selected source (the same output Normal audio/video and S video signal source as the G-2/- €92 connector)
 - Audio signal
 - No outputs

Selecting input with PROGR +/- or number

You can preset video input sources to the programme positions so that you can select them with PROGR +/- or number buttons. For details, see "Presetting Channels Manually" on page 10.

Selecting Input and Output

This section explains how to view the video input picture (of the video source connected to your TV), and how to select the output signal using direct access buttons or the menu system.

Selecting input

Press - repeatedly to select the input source. The symbol of the selected input source will appear.

To go back to the normal TV picture

Press □.

Input modes

Using AV Label Preset

Using this function you can preset the desired input source (e.g. --
¬□ 1, RGB signal) to the respective AV input (AV 1 --□). In this way, a connected VCR will automatically switch to the RGB signal.

- 1 Press MENU
- 3 Push to blue or green to select "AV Label Preset". Push to yellow.
- 4 Push to blue or green to select the desired input source. Push to yellow to confirm.
- 5 Push to blue or green to select a letter or number. Push to yellow (select "-" for a blank).
 Select the other four characters in the same way.
- 6 After selecting all the characters, press the joystick to confirm.
- 7 Repeat steps 4 to 6 to label other input sources.
- 8 Press the MENU button to return to the normal TV picture.

VIDEO CONNECTION

Checking and Selecting the Input and Output Sources Using the Menu

You can display the menu to see which input sources are selected for the TV screen, as well as which output source is selected. You can also select them on the menu display.

- 1 Press MENU.
- 2 Push the joystick to blue or green to select the symbol 'C' on the menu screen. Push to yellow to confirm.

The VIDEO CONNECTION menu appears.
You can see which source is selected for the TV and for the output.
If you want to select the input and output on this menu, go on to the

You can see which source is selected for the TV and for the output. If you want to select the input and output on this menu, go on to the next step.

3 Push to blue or green to select "TV Screen" (input source for TV-screen), or "Output" (output source for ເ→ 2/-ເ到 2 and ເ→ 3/-ເ到 3).

Push to yellow to confirm.

- 4 Push to red or yellow to select the desired source. Press joystick to store.
- 5 Repeat steps 3 to 4 to select the source for other inputs or outputs.
- 6 Press MENU to return to the normal TV picture.

When recording
When you use the ●
(record) button, make
sure to press this button
and the one to the right
of it simultaneously.

Sony

TV

Remote Control of Other Sony Equipment

You can use the TV Remote Commander to control most of Sony remote-controlled video equipment: beta, 8 mm and VHS VCRs and video disc players.

Tuning the Remote Commander to the equipment

1 Set the VTR 1/2/3 MDP selector according to the equipment you want to control:

VTR1: Beta VCR VTR2: 8 mm VCR VTR3: VHS VCR MDP: Video disc player

 Use the buttons indicated in the illustration to operate the additional equipment.

additional equipment.

If your video equipment is furnished with a COMMAND MODE.

selector, set this selector to the same position as the VTR 1/2/3 MDP selector on the TV Remote Commander.

If the equipment does not have a certain function, the corresponding button on the Remote Commander will not operate.

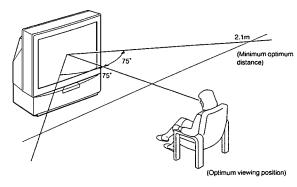

If you select "AUTO" for output, the output source automatically becomes the same as the desired input source.

For Your Information

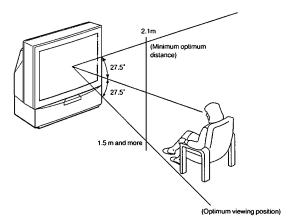

Optimum Viewing Area

For the best picture quality, try to position the projection TV so that you can view the screen from within the areas shown below.

Horizontal viewing area

Vertical viewing area

24

Troubleshooting

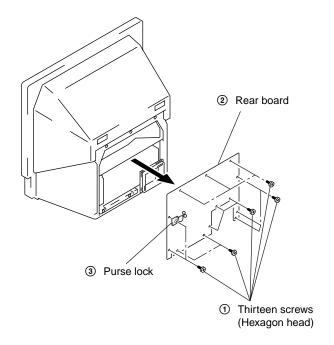

Here are some simple solutions to some problems which may affect the picture and sound.

Problem	Solution
No picture (screen is dark), no sound	Plug in the TV in. Press ① on the TV (if ① indicator is on, press □ or a programme number on the Remote Commander). Check the aerial connection. Check if the selected video source is on. Turn the TV off for 3 or 4 seconds then turn it on again using ①.
Poor or no picture (screen is dark), but good sound	 Press o enter the PICTURE CONTROL menu and adjust the brightness, contrast and colour.
The menu and picture disappear (if contrast and brightness are minimum)	Press MENU on the Remote Commander or on the front panel of the TV set
Good picture but no sound	Press ∠ +. Check if " Center in " is selected on the SOUND CONTROL menu. If □% is displayed on the screen, press □%.
No colour for colour programmes	 Press to enter the PICTURE CONTROL menu, select RESET, then press the joystick to confirm.
Remote Commander does not function	The batteries are weak.

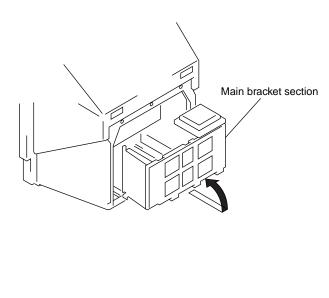

If you continue to have problems, have your TV serviced by qualified personnel. Never open the casing yourself.

SECTION 2 DISASSEMBLY

2-1. REAR BOARD REMOVAL

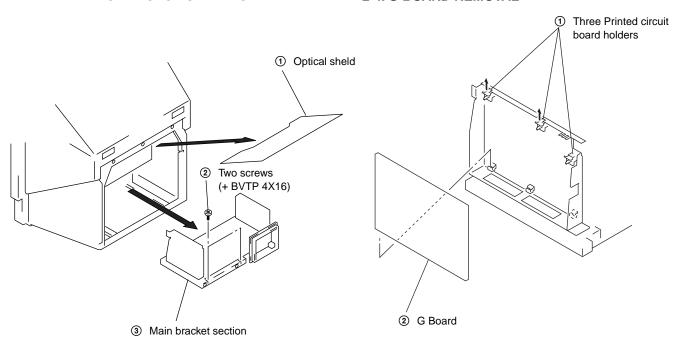

2-3. SERVICE POSITION

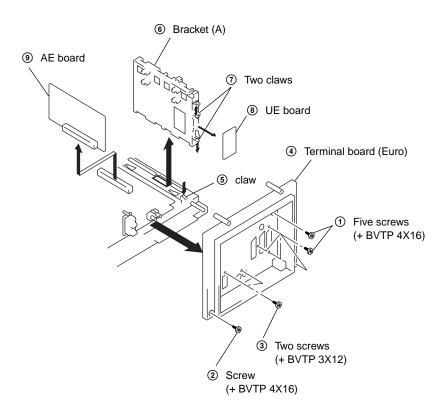

2-2. MAIN BRACKET SECTION REMOVAL

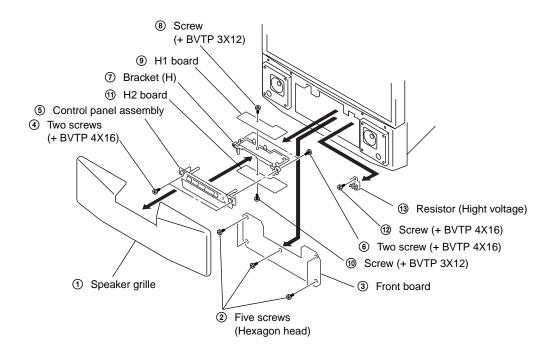

2-4. G BOARD REMOVAL

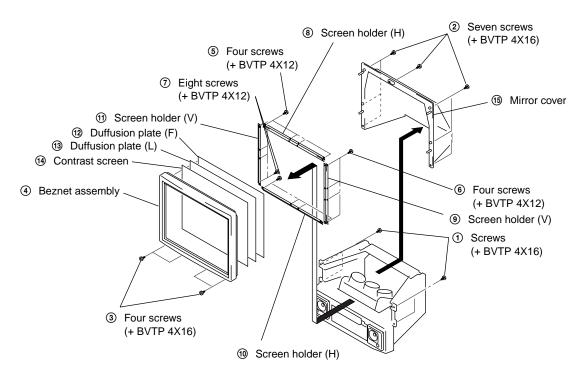

2-5. AE BOARD AND UE BOARD REMOVAL

2-6. H1 BOARD, H2 BOARD AND RESISTOR (HIGHT VOLTAGE) REMOVAL

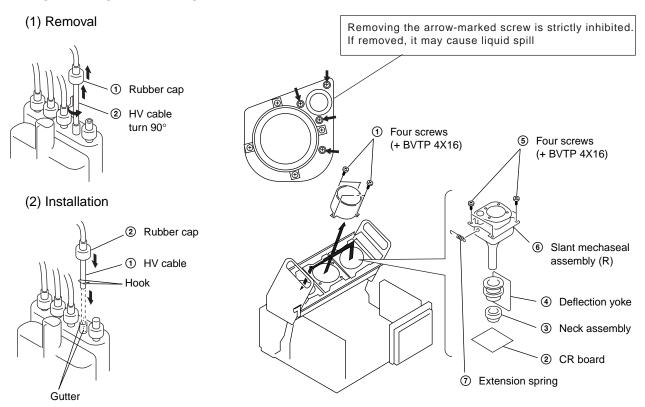

2-7. BEZNET SECTION REMOVAL

2-8. HIGH-VOLTAGE CABLE INSTALLATION AND REMOVAL

2-9. SLANT MECHASEAL ASSEMBLY REMOVAL

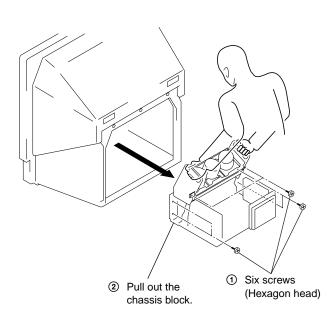

2-10. CHASSIS BLOCK REMOVAL

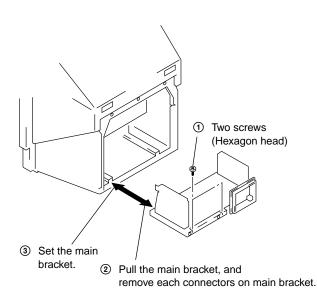

(1) H1, H2 BOARDS AND AND RESISTOR REMOVAL

(a) Four connectors (b) Resister (High voltage) (c) Screw (+ BVTP 4X16) (d) Resister (High voltage) (e) Screw (+ BVTP 4X6) (f) Three connectors (g) Control panel assembly

(3) CHASSIS BLOCK REMOVAL

(2) MAIN BRACKET REMOVAL

※ Pay particular attention to the wires of each Printed circuit boards when puling out the main bracket.

- - At this time, pay particular attention to the components removed in (1).

SECTION 3 SET-UP ADJUSTMENTS

3-1. SCREEN VOLTAGE ADJUSTMENT (ROUGH ALIGNMENT)

- 1. Receive the Monoscope signal.
- 2. Set 50% BRIGHTNESS and minimum PICTURE.
- Turn the red VR on the FOCUS block all the way to the left and then gradually turn it to the right until the point where you can see the retrace line.
- 4. Next gradually turn it to the left to the position where the retrace line disappears.

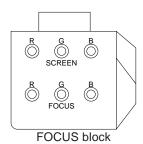

Fig. 3-1

3-2. FOCUS LENS ADJUSTMENT

- 1. Loose the lens screw.
- 2. Set in service mode.
- 3. Use GH (GSEL) on the service mode menu to shown only the green color.
- 4. Press the Commander Menu button and select TEST MENU and CONVERGENCE to display the test signal (crosshatch) on the screen.
- 5. Rotate the green lens and align with the optimal focus point from the test signal.
- Use GH (GSEL) from the service mode menu to set to green and red.
- 7. Output the test signal and rotate the red lens to obtain the optimum focus at the point where the red and green spots overlap.
- 8. Use BH (BSEL) from the service mode menu to set to red and blue.
- Output the test signal and rotate the blue lens to obtain the optimum focus at the point where the blue and red spots overlap.
- 10. Tighten the lens screw.

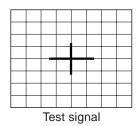

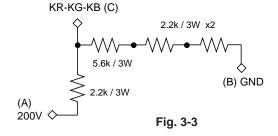

Fig. 3-2

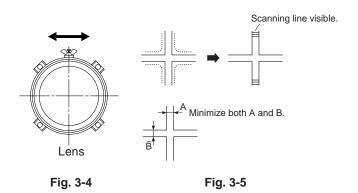

3-3. SCREEN (G2) ADJUSTMENT

- 1. Connect jig (A) to 200V. In TP732, CG Board.
- 2. Connect jig (B) to GND. In TP733, CG Board.
- 3. Select with Power ON, VIDEO mode without signals.
- 4. Connect jig (C) to the TP701 (K.CR), TP731 (K:CG), or TP761 (K.CB) of CR, CG, and CB Board.
- 5. Adjust R, G, and B screen voltage to until retrace line just appears with screen VR on the Focus block

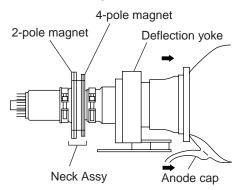

3-4. FOCUS VR ADJUSTMENT

- 1. Set in service mode.
- Use GH (GSEL) on the service mode menu to shown only the green color.
- 3. Press the Commander Menu button (convergence) and output the test signal (crosshach).
- 4. Rotate the green VR on the FOCUS block and align to obtain the optimal focus point.
- Use GH (GSEL) from the service mode menu to set to green and red.
- 6. Output the test signal and rotate the red VR to obtain the optimum focus at the point where the red and green spots overlap.
- Use BH (BSEL) from the service mode menu to set to red and blue.
- 8. Output the test signal and rotate the blue VR aligning to obtain the optimum focus at the point where the blue and green spots overlap.

3-5. DEFLECTION YOKE TILT ADJUSTMENT

- 1. Set to receive the Monoscope signal.
- 2. Set in service mode.
- 3. Place the caps on the red and blue lens so that only the green color.
- 4. Loosen the deflection yoke setscrew and align the tilt of the Deflection Yoke so that the bars at the center of the monoscope pattern are horizontal.
- 5. After aligning the deflection yoke, fasten it securely to the funnel-shaped portion (neck) of the CRT.
- 6. The tilt of the deflection yoke for red and Blue is aligned the same as was done for green.

Deflection yoke should be as more close to CRT as possible.

Fig. 3-6

3-6. 2-POLE MAGNET ADJUSTMENT

- 1. Set in service mode.
- 2. Set to receive the Dot signal.
- 3. Place the caps on the red and blue lens so that only the green color is shown.
- 4. Turn the green VR on the focus block to the right and set to overfocus to enlarge the spot.
- 5. Now align the 2-Pole Magnet so that the enlarged spot is in the center of the Just Focus spot.
- 6. Align the green focus VR and set for just (precise) focus.
- 7. Perform the same alignment for red and blue.

Use the center dot

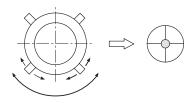

Fig. 3-7

3-7. 4-POLE MAGNET ADJUSTMENT

- 1. Set in service mode.
- 2. Set to receive the Dot signal.
- 3. Place the caps on the red and blue lens so that only the green color is shown.
- 4. Turn the green VR on the focus block to the left and set to underfocus to enlarge the spot.
- Now align the 4-Pole Magnet so that the enlarged spot becomes a perfect circle.
- 6. Perform the same alignment for red and blue.

Use the center dot

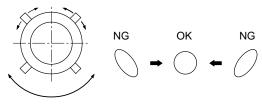

Fig. 3-8

3-8. DEFOCUS ADJUSTMENT (Blue)

- 1. Receive the Dot signal.
- Place the caps on the red and green lens so that only the blue color is shown.
- 3. Rotate the blue focus volume on the focus pack and adjust to obtain best electrical focus.
- Rotate Blue focus volume of focus pack clocwise, so that diameter of the Dot see Caution.

[How to Blue defocus.]

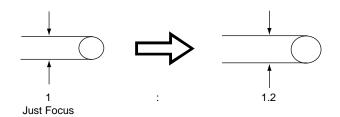

Fig. 3-9

[Change Blue Defocus]

Fig. 3-10

SECTION 4 SAFETY RELATED ADJUSTMENT

When replacing the following components marked with

on the schematic diagram, always check hold-down voltage and if necessary re-adjust.

Part Replaced (►)	
R1	

Part Replaced (☑)						
E Board	L506,	Q502,		R514,		
G Board	IC6008					

- 1. Remove CN810. Connect HV meter to HV Block.
- 2. Connect External Power Supply to CN810 2 pin (+135V) and ① pin (GND).

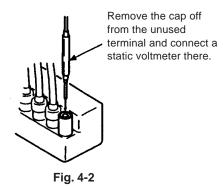

Fig. 4-1

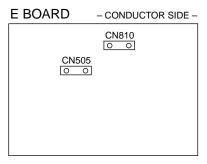

Fig. 4-3

Fig. 4-4

- 3. Turn on the set.
- 4. Slowly up the supply voltage from 0V to 135V.
- 5. Receive dot picture and set PICTURE/BRIGHTNESS to
- 6. Slowly up the voltage until hold-down circuit works (picture disappear).
- 7. Read the HV meter of peak HV voltage.
 - Spec: 34.5±0.75KV
- 8. If Hold-down voltage is less than 33.75KV then solder R1=820K.
- 9. If hold-down voltage is over than 35.25KV then take-off R514 and solder R1=9.1K.

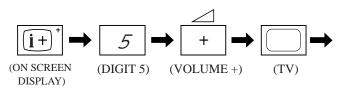

SECTION 5 CIRCUIT ADJUSTMENTS

5-1. ELECTRICAL ADJUSTMENTS

Service adjustment to this model can performed with the supplied remote commander RM-862.

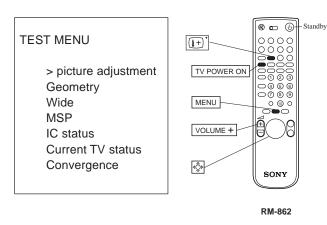

HOW TO ENTER INTO SERVICE MODE

- 1. Turn on the main power switch of the set and enter into standby mode.
- Press the following sequence of buttons on the Remote Commander.

"TT—" will appear in the top right comer of the screen. Other status information wull also be displayed.

Press MENU on the commander to obtain the following menu on the screen.

- 4. Move to the correspondind adjustment using the ₄⊕̂ button on the commander.
- Move the button to the right ⟨□⟩ to enter the selected adjustment.
- 6. Before TURN OFF is necessary:

 [DATA WRITE], [DATA COPY] in 4:3 and 16:9 mode.
- 7. Turn off the power to quit the service mode when adjustments are completed.

5-3. REGISTRATION (CONVERGENCE) ADJUSTMENT METHOD

PAL REGISTRATION ADJUSTMENT

- 1) Receive the PAL SPCB signal.
- 2) Select Service mode and enter adjustment items for Green signal.

With the joystick:

↑ Items change

← → Data change

In internal pattern it appears only RG or G only.

ITEM CHSW 01 External pattern CHSW 00 Internal pattern

CENTER ADJUSTMENT

1) Adjust GH and GV CENT.

GH CENT

SIZE ADJUSTMENT

SPEC: H-SIZE 16.4 +/- 0.15 Sq.

V-SIZE 12.3 +/-0.15Sq.

VSP HSIZE

VSP VSIZE

5-4. GEOMETRY

Before adjust GEOMETRY, sure the data in convergence.

- GH SIZE = 0
- GV SIZE = 0
- Adjust S correction

MAIN DEFLECTION ADJUSTMENT

1) Adjust VSP V-Lin.

Correct linearity of the horizontal top and bottom lines.

VSP VLINE

2) Adjust AFC ANGLE

Correct the vertical center line to be in parailel with the screen edges and other colors.

AFC ANGLE

3) Adjust AFC BOW

Correct linearity of the vertical center line.

AFC BOW

4) Adjust PIN AMP

Correct the vertical left and right lines and eliminute pincushion-shaped distortion.

PIN AMP

5) Adjust PIN PHASE

Correct the vertical left and right lines to be in parallel with each other.

PIN PHASE

6) Adjust UP CORN PIN

Correct the screen top section line bow.

UP CORN PIN

KP-41S5/41S5B/41S5G/ 41S5K/41S5R/41S5U

7) Adjust LO CORN PIN

Correct the screen bottom section line bow.

VERTICAL LINE ADJUSTMENT

MENU → Convergence

- 1. Carefully watching out for the GH CENT screen centre section, adjust GH CENT, GH BOW, GH SKEW.
- 2. GH 4th Bow adjustment. Correct the corner distortion which could not be adjusted with GH BOW.

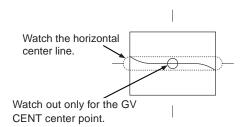

HORIZONTAL LINE ADJUSTMENT

- 1. Finely adjust the centre position of the vertical line at the centre of the screen with GV CENT.
- 2. Using GV SKEW and GV BOW, correct the tilt and bow of the horizontal line at the centre of the screen.

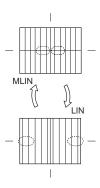

GV BOW

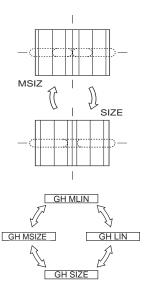

SIZE AND LINEARITY ADJUSTMENT

- 1. Balance the sizes at both sides of the centre section of the screen with GH MLIN.
- 2. Balance the sizes on both end sections of the screen with GH LIN.
- 3. While tracking, adjust with GH MLIN and GH LIN so that the sizes of the horizontal line at the centre of the screen are symmetrical left and right.

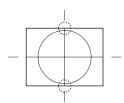

HORIZONTAL SIZE ADJUSTMENT

- 1. Adjust with GH MSIZE, so that the sizes of both edges and centre are equal.
- 2. Adjust with GH SIZE, so that the horizontal sizes of both edges and centre are equal.
- 3. While tracking adjust GH MSIZE and GH SIZE so that the space intervals for the horizontal section of the screen are equal.
- 4. Adjust again if M LIN is changed after GH MSIZE and GH SIZE are complete.

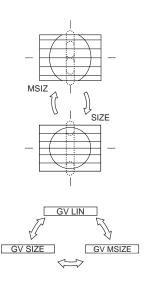

GREEN VERTICAL LINEARITY ADJUSTMENT

1. Adjust GV LIN so that the vertical lines at the top and bottom of the screen are symmetrical.

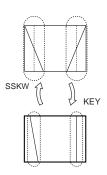

GREEN VERTICAL SIZE ADJUSTMENT

- 1. Adjust GV MSIZE so that the sizes at the top and bottom and centre are equal.
- 2. Set the vertical size to correct specification.
- 3. While tracking adjust GV MSIZE and GV SIZE so that the space intervals for the vertical line of the screen are equal, also the vertical size should be within space.
- 4. Adjust again if GV L IN has been altered after completing the above adjustments.

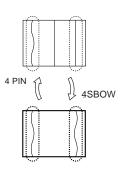

GREEN HORIZONTAL TRAPEZOIDAL DISTORTION ADJUSTMENT

- 1. Adjust GH SSKW so that the tilt of the vertical lines at both edges of the screen are symmetrical left and right.
- 2. Adjust GH KEY so that there is no tilt in the vertical lines at both edges of the screen.
- 3. While tracking adjust GH KEY and GH SSKW.

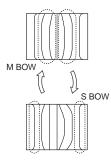

GREEN HORIZONTAL QUATERNARY ADJUSTMENT

- 1. Adjust GH 4PIN, to correct the 4th order distortion.
- 2. Adjust GH 4SBO to balance and correct the 4th order distortion at both edges of the screen.
- 3. While tracking adjust GH 4PIN and GH 4SBOW.

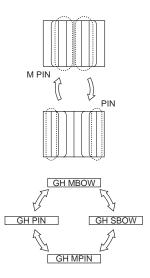

GREEN HORIZONTAL ASYMMETRICAL PIN DISTORTION ADJUSTMENT

- 1. Adjust GH MBOW, so that the pin asymmetry at both sides of the centre section are symmetrical left and right.
- 2. Adjust GH SBOW so that the bow at both edges of the screen is symmetrical left and right.
- 3. While tracking adjust GH MBOW and GH SBOW so that the bow of vertical lines over the entire screen is symmetrical.

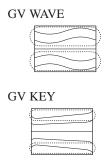

GREEN HORIZONTAL SYMMETRICAL PIN DISTORTION ADJUSTMENT

- 1. Adjust GH MPIN to correct pin distorton at both edges of the centre section.
- Use GH PIN to correct pin distortion at both edges of the screen.
- 3. While tracking adjust GH MPIN and GH PIN so that the PIN of vertical lines on the entire screen have no bowing.
- 4. If there is asymmetrical distortion after adjustments, re-adjust GH MBOW and GH SBOW while tracking.

GREEN VERTICAL WAVE (3RD-ORDER) DISTORTION ADJUSTMENT

- Check the screen at the top & bottom, and look for any 2nd or 3rd order waveform distortion of horizontal lines. Correct with GV WAVE.
- 2. While tracking adjust GV WAVE and GV KEY, if here are any KEY distortion.

GREEN VERTICAL 4TH ORDER DISTORTION ADJUSTMENT

 By using GV 4 PIN, 4th-Order distortion of the horizontal lines at the top & bottom can be corrected.
 Since there is no 4SBO for vertical correction, there will be a slight imbalnace, but adjust the registration to eleiminate any distortion.

GREEN VERTICAL TRAPEZOIDAL DISTORTION ADJUSTMENT

- 1. Adjust GV SSKW so that the tilt of the horizontal lines at the top and bottom of the screen are symmetrical.
- Adjust GV MKEY so that there is no tilt for the middle section.
- 3. Adjust GV KEY so that there is no tilt at the top and bottom of the screen.
- 4. While tracking adjust GV MKEY and GV KEY, so that there is no tilt over the entire screen.
- 5. If the tilt is unbalanced after GV MKEY and GV KEY have been adjusted, readjust GV SSKW.

GREEN VERTICAL ASYMMETRICAL PIN DISTORTION (2ND-ORDER DISTORTION) ADJUSTMENT

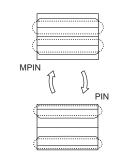

1. Correct the asymmetrical pin distortion at the top and bottom of the screen with GV SBOW.

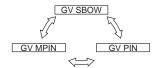

GV SBOW

GREEN VERTICAL ASYMMETRICAL PIN DISTORTION ADJUSTMENT

- 1. Using GV MPIN adjust the pin distortion at both edges of the screen and at the centre.
- 2. Using GV PIN, adjust, so that the horizontal lines at the top & bottom of the screen are straight lines.
- 3. Adjust GV MPIN & GV PIN so that there is no curve in the horizontal lines on the entire screen.
- 4. After adjusting the items above, using tracking with GV SBOW. GV MPIN, and GV PIN to correct the entire screen.

GREEN AND RED REGISTRATION ADJUSTMENT

- 1. Receive a PAL cross-hatch signal.
- Adjust so that the red lines lay on the green lines.
 Adjust, using the same procedure as the GREEN SUB adjustment outline above.

Note: Main registration correction should not be while adjusting Red adjustment.

BEWARE: Not to change Green Sub Items It's easily done by mistake.

GREEN AND BLUE ADJUSTMENT

1. Adjust so that the blue and green lines are on top of each other.

Note: Main registration correction should not be while adjusting Blue adjustment.

BEWARE : Not to change Green & Red Sub Items. It's easily done by mistake.

REGISTRATION DATA WRITE

* Points to bear in mind:

There are two independent modes of pictures 4 : 3 MODE and 16 : 9 MODE

1. Once REGISTRATION 4 : 3 has been adjusted Press "Mute" + 0 >"Data Write"

(write data in NVM)

Press "On screen disp." + 0 >"WRT 5060" Pal to NTSC (write data Pal/Secam to NTSC)

If 2 + 0 is pressed (Data copy) it is recording data from 4 : 3 to 16 : 9 mode. So it should be adjusted in 16 : 9 mode.

2. Adjust REGISTRATION in 16:9 mode.

Press "Mute" + 0 >"Data Write"

(write data in NVM)

Press "On screen disp." + 0 >"WRT 5060"Pal to NTSC (write Pal/Secam to NTSC)

3. Once REGISTRATION has been adjusted in both modes (4:3 and 16:9)

- a) With picture go into service mode
- b) Press TT and "autoconvergence" button in control panel and wait for the adjusting
- * Make sure input signal is PAL. If input signal is NTSC and do this process, NTSC data are copied to PAL data!

5-5. AGC ADJUSTMENT

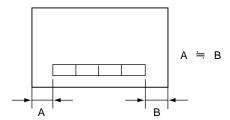

- 1. Receive an off-air signal.
- Adjust the AGC VR (IF 1001) so that there is no snow noise and cross-modulation.

5-6. WHITE BALANCE ADJUSTMENT

- 1. Receive the monoscope signal and adjust the picture quality with the menu.
- 2. Adjust service mode S-BRIGHT so that the signal 10 IRE section barely glows.
- 3. Receive the all-white pattern signal.
- 4. Adjust the white balance with service mode G-CUTOFF and B-CUTOFF.
- 5. Adjust service mode S-BRIGHT so that the signal 100 IRE section barely glows.
- 6. Adjust the white balance with service mode G-DRIVE and B-DRIVE.
- 7. Repeatedly adjust the white balance for the minimum and maximum picture settings.

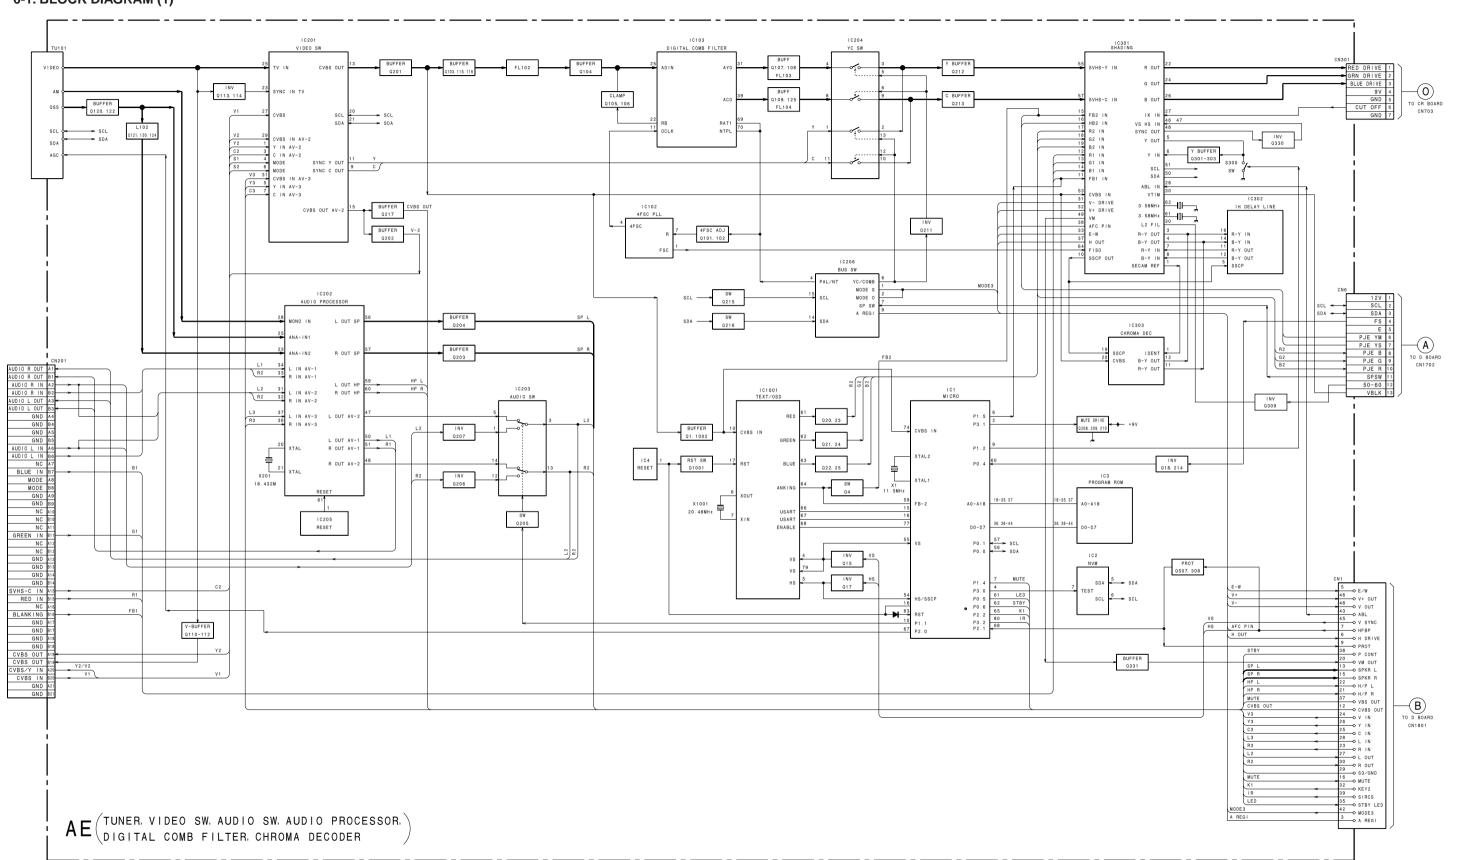

5-7. TEXT POSITION ADJUSTMENT

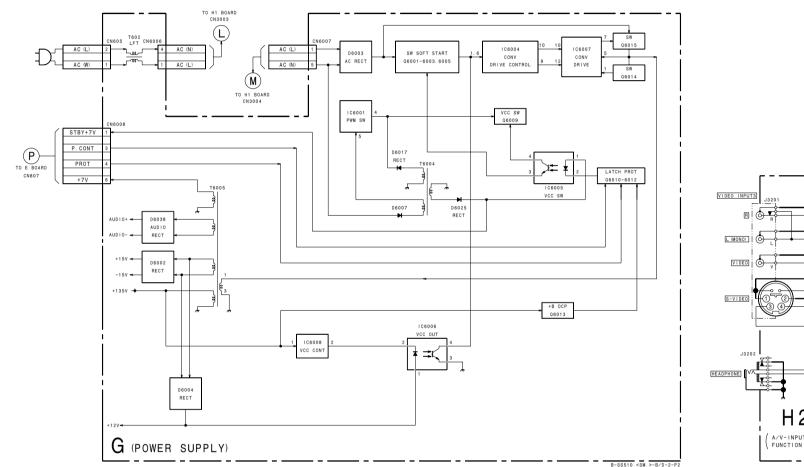

- 1. Receive RF signal with text.
- 2. Press TT74 (Text H position adjustment) of Test commander.
- 3. Adjust H Position of Text.

NOTE:

• Items with no part number and no description are not stocked because they are seldom required for routine service.

SECTION 7 EXPLODED VIEWS

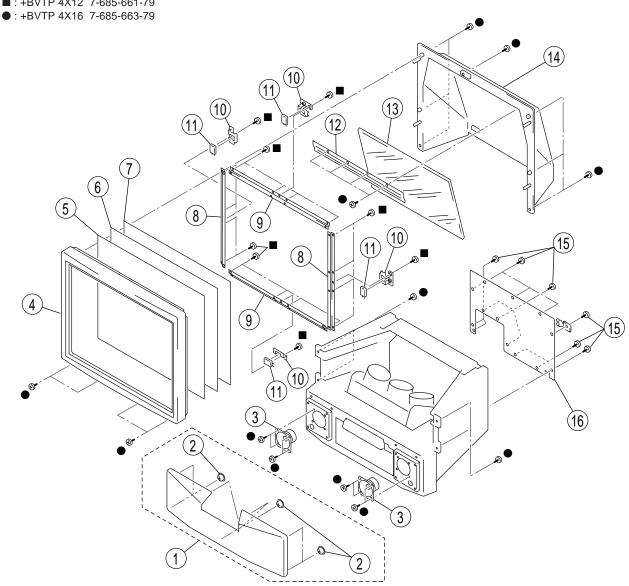

- The construction parts of an assembled part are indicated with a collation number in the remark
- Items marked " * " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering

The componants identified by shading and mark \triangle are critical for safety.

Replace only with part number specified.

SECTION 8 ELECTRICAL PARTS LIST

NOTE:

The componants identified by shading and mark \triangle are critical for safety.

Replace only with part number specified.

- The components identified by

 in this manual have been carefully factory-selected for each set in order to satisfy regulations regarding X-ray radiation. Should replacement be required, replace only with the value originally used.
- Items marked " * " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.

RESISTORS

- · All resistors are in ohms
- F : nonflammable

When indicating parts by reference number, please include the board name.

- CAPACITORS PF : $\mu\mu$ F
- There are some cases the reference number on one board overlaps on the other board. Therefore, when ordering parts by the reference number, please include the board name.
